

STATISTICAL ANNEX

CURRENT SITUATION OF THE COLOMBIAN ECONOMY

This is the Statistical Annex of a new publication by the Governor of the Central Bank of Colombia. It is addressed to citizens, analysts, and domestic and foreign investors interested in learning about the most recent events in the Colombian economy, and their implications for monetary policy decision-making. The Statistical Annex will be updated on a monthly basis.

Source: *Banco de la República*.

NOTES:

1/ This is *Banco de la República's* benchmark intervention rate according to the decision reached by the Board of Directors in said month, enforceable since the first working day after that session.

2/ Calculated as the weighted average value per amount for consumption, credit, preferential, ordinary, and treasury rates. Due to the high rotation of treasury credit, its weight was determined as the fifth part of its weekly disbursement.

3/ This corresponds to non-VIS weighted housing rates in UVR and pesos.

4/ According to the information from the balance of payments.

5/ The indicators at the closing of each quarter are calculated based on the data from the last four quarters.

6/ This includes long-term amortizations and the balance of the short-term debt from a year before.
